

THE HALLEY PROJECT:

A Mission In Our Solar System

Flight Instructions Reference Card: Commodore

Equipment Needed

Commodore 64™ or Commodore 128™ computer
TV or monitor
Disk drive
Joystick

Disk Loading Instructions

1. Make sure the joystick is plugged into controller port 2 before turning on the computer.
2. Turn on the computer. If you have a Commodore 128, hold down the  (Commodore) key when you turn on the computer.
3. Turn on the disk drive and the monitor.
4. When the busy light goes off, insert The Halley Project disk into the disk drive and close the drive door.
5. Type: LOAD "HALLEY", 8, 1
6. Press RETURN
7. The program will load. After the title screens, you will see a letter from P.L.A.N.E.T. Headquarters. When you have read the letter and are ready to go on, press any key.
8. Follow the directions on the screen to enter your name and select your mission.

To restart the program, press the RUN/STOP and RESTORE keys at the same time.

To erase all names and records, press the CTRL and I keys at the same time.

AT THE CONTROL PANEL

To accelerate in a certain direction, push the joystick in that direction. The longer you hold the joystick in that direction, the faster your speed will be.

To go into Hyperspace, increase your speed to 300,000 km/s. At 250,000 km/s, a warning buzzer sounds to let you know you're approaching Hyperspace.

To brake, press the space bar. If you are in Hyperspace, pressing the space bar brings you to an immediate stop. If you are traveling at a speed less than 300,000 km/s, each press of the space bar reduces your speed by about 50%.

To change your field of vision, hold the joystick button down while you move the joystick to the right or to the left. NOTE: This will not change the direction in which you are moving.

To select your power level, press H for High Power or L for Low Power.

To engage the automatic landing system, press A when the Planet/Moon Finder blinks and beeps. NOTE: There is no special landing area on Halley's Comet; simply fly into the comet to "land" on it.

To blast off from a planet or moon, press B.

To see the Radar Screen, press R on the keyboard.

THE RADAR SCREEN

To zoom in, push the joystick forward. This will put you at a closer vantage point, but may not give you a full view of all the planets at once.

To zoom out, pull back on the joystick. This will give you a view of all the planets at the same time.

To return to the Control Panel from the Radar Screen, press R on the keyboard.
